

Karomatullokhon Akhrorov

Android Developer · Kotlin & Jetpack Compose

Email: akhrorovk5758@gmail.com	Phone: +7 999 195-58-58	Portfolio: github.com/Ahrorovk	Location: St. Petersburg, RU
--	-----------------------------------	--	--

SUMMARY

Android Developer with **3+ years** of commercial experience building production-ready mobile applications using Kotlin and Jetpack Compose. Experienced in video streaming, real-time camera processing, WebRTC, and AI-powered fitness applications. Strong focus on clean architecture, performance optimization, and scalable client-server solutions. Published **3 apps** on Google Play with **1,000+ installs**. Also experienced in backend development (Ktor, Java, REST API, PostgreSQL).

TECHNICAL SKILLS

Android	Kotlin, Java, Jetpack Compose, XML, Android SDK, CameraX, ExoPlayer, WebRTC, Firebase, Hilt, Coil
Architecture	MVVM, MVI, Clean Architecture, Multi-module projects
Networking	Retrofit, REST API, Room, SQLite
Backend	Ktor, Java, JWT, OAuth, PostgreSQL, MySQL
Async	Coroutines, Flow
Other	Git, Gradle, Docker, Jira, Scrum, KMP, Smart CMP

EXPERIENCE

Android Developer — ANT TV Nov 2025 – Present
Saint Petersburg · ant-tv.tj

- Developed and maintained an Android application for an online cinema platform (Kotlin + Jetpack Compose, MVVM)
- Integrated ExoPlayer for VOD playback with error handling and state management
- Implemented Picture-in-Picture mode and background playback via Foreground Service
- Built local caching with Room; optimized network layer using Retrofit (REST API)
- Integrated Hilt for dependency injection and Coil for image loading
- Improved application stability through refactoring and lifecycle optimizations

Android Developer — RMe Fitness Aug 2025 – Present
Saint Petersburg

- Developed a real-time fitness application with live video streaming using WebRTC
- Worked with device camera: video capture, frame processing, and performance optimization
- Integrated AI models for body pose detection, keypoint rendering, and movement analysis
- Built real-time exercise technique analysis with AI-powered virtual trainer feedback
- Optimized FPS and latency for a smooth real-time user experience

Android Developer — Cluster LLC Jul 2025 – Sep 2025
Saint Petersburg

- Developed and maintained a VPN application based on the Xray library
- Built UI with Jetpack Compose using MVVM architecture; integrated Hilt for DI

- Integrated backend APIs via Retrofit and Firebase services (analytics, push notifications)
- Optimized performance and resolved critical bugs

Android / Backend Developer — Freelance (Kwork)

Apr 2023 – Present

- Developed Android applications using Kotlin, Java, XML, and Jetpack Compose
- Designed and implemented backend services with Ktor and Java; built REST APIs
- Integrated PostgreSQL and MySQL databases; implemented JWT and OAuth authentication
- Published and maintained multiple applications on Google Play
- Completed 12+ client orders; trained 10+ students in Android development

Android Developer — Innovation of Future-Builder

Jun 2022 – Mar 2023

- Developed a logistics management application from prototype to production release
- Built architecture using MVVM with Firebase (Auth, Firestore, Realtime Database)
- Collaborated using Agile/Scrum: code reviews, sprint planning, feature implementation
- Delivered a 15-lesson Android development course for beginners (Nov–Jan 2023)

PUBLISHED APPLICATIONS

- **400 Common Words** — educational vocabulary app (Google Play)
- **News Wave** — personalized news application (Google Play)
- **Handy Helper** — personal productivity app: notes, goals, finances, habits (Google Play)

Combined: 1,000+ installs

EDUCATION

B.Sc. Software Engineering — ITMO University

Expected 2028

Saint Petersburg, Russia

CERTIFICATIONS

- Kotlin Multiplatform — Philip Lackner (2023)
- Android Development from Scratch (2022)
